

TOP REASONS WHY DIG & HAUL DOESN'T MAKE SENSE

These
landfills pose
**no current
threat.**

The **longer the
trash remains
buried** the more
diluted the trace
contaminants become.

**Dilution will continue to
lower the already low risk**
of contamination even when the Kraemer
Quarry stops dewatering.

Other landfills
are in far
**greater
need** of
attention.

Legislature budgets
\$165 million
for dig and haul.
Funds are never allocated.

Dig and Haul **will take years,**
and cost up to \$500 million

**There is no
guarantee** that
dig and haul will
eliminate all traces of
the remaining
contaminants.

If dig and haul is funded with
tax dollars, the site would be
subject to a **mandated
non-development
period** of nearly 40 years.
